Natural Range in Florida

USDA Zones

Suitable to grow in:

Landscaping

- Recommended Uses: Groundcover.
- Light: ☁ Shade
- Moisture Tolerance: Usually moist, occasional inundation ----- to Somewhat moist, no flooding
- Salt Water Flooding Tolerance: Not salt tolerant of inundation by salty or brackish water.
- Salt Spray Tolerance: Low/no tolerance of salty wind or direct salt spray
- Soil/Substrate: Epiphytic (growing on trees), Humus (organic upland)

Wildlife

The floral morphology of *Peperomia* species suggests wind- and/or insect pollination, but not much is known.
